

# velcro connection

## SCREEN SYSTEM

*light, easy, durable*

The unique Modulink Velcro Screen System is the ideal way to provide attractive partitioning within a work environment. And so easy to erect!

The strong, versatile and lightweight panels simply push together to connect at corners or in straight lines.

They may be attached directly to walls, are available freestanding on slim support feet, or stand independently when supporting screens are attached. Castors may be fitted to support feet to provide easy repositioning or mobility if required.

Rounded, smooth top and end aluminium cappings in an attractive silver finish add to the stylish looks.

Four standard colours are available, ex stock, in Charade fabric. A full range of other colours and fabrics are also available.

Riviera

Navy

Mineral Red

Silver

- Excellent flexibility
- Push pinnable
- Excellent screening for work stations or to hide unsightly areas
- Excellent acoustic properties help reduce noise
- Makes office environments look attractive
